

UPPER DARBY TOWNSHIP

TRAFFIC CALMING: PETITION FOR INFORMATIONAL MEETING

After an initial Traffic Calming Inquiry Form is submitted by an affected resident to the Township Staff, the Staff will indicate the area affected by the proposed traffic calming device.

The generally affected area will be determined based on proximity to the proposed traffic calming feature, likelihood of traffic diverting onto adjacent roadways as a result of the proposed traffic calming feature, and roadways where residents will be impacted by the feature.

Township Staff will provide a public informational presentation to present background information on traffic calming and explain the Township's traffic calming policy **if requested by 50% of the specifically affected property owners** by completing and submitting this Petition for Informational Meeting.

“Specifically Affected” refers to properties adjacent to roadways within a neighborhood area, as determined by Township staff, that are directly affected by traffic problems and/or the installation of traffic calming features. A specifically affected property must have at least one side or portion of the parcel abutting the roadway on which traffic calming features are being considered, or the only access to said property is by way of said street (e.g., cul-de-sacs).

If the minimum required signatures are received, notification of the public meeting by the Township will be made through the Upper Darby Township webpage and by notifying the contact person identified on the Petition form. Please return this completed petition form to the Upper Darby Township Building (100 Garrett Rd, Upper Darby, PA 19082).
